# Enharmonic Notes

---

*ANSWER KEY*

Name that enharmonic! Write the enharmonically equivalent note for each given note. Remember that enharmonically equivalent notes sound the "same" but are spelled differently. The first one is given as a reminder.

1.                      2.                      3.                      4.                      5.

6.                      7.                      8.                      9.                      10.
